**New Tenant At BioHio Provides New Solutions For Nonprofit Collaboration**

**Wooster, Ohio: — July 26, 2017 —** BioHio Research Park announces the addition of Cureo to their incubator, based on the campus of OARDC. Cureo provides online collaboration technology software for nonprofit boards, committees, teams, and community taskforces.

Andrew Vaeth, CEO of Cureo says, "We've doubled our staff to support our recent growth, making this the ideal time to move our corporate headquarters to the BioHio Research Park. The location is modern, well equipped, and inspires us to thrive on the entrepreneurial energy of our fellow tenants. This is a wonderful opportunity for Cureo as we expand our mission: to bring people and communities together with collaborative technology."

- Cureo, the online collaboration technology for nonprofits and their communities, is an easy-to-use web-based tool that transforms an organization's website into a communication hub, including capabilities for messaging, events, task management, content publication.
- With Cureo, it is an easy way to take part in advancing an organization's mission: they engage with the organization through their email and via the organization's home page for a simple and organized way to join conversations, share documents, and collaborate on boards, committees, and community partnerships.
- Cureo recently closed a \$2 million venture round led by a private investment group in North Carolina, involving participation from Cleveland's **Jumpstart**, Ohio-based **Impact Angel Fund** and also includes matching funds from the **Ohio Third Frontier Program**. The funds allow Cureo to expand its growth increasing reach, awareness, staff, and product value.

"BioHio Research Park is pleased to welcome Cureo to our entrepreneurial community. We look forward to supporting their development through our partnership in the Northeast Ohio Entrepreneurial Signature Program network. Cureo's product offers an exciting and efficient tool for use by nonprofit organizations. We look forward to introducing them to potential customers in the agricultural industry," states Shauna Brummet, PhD, BioHio CEO.

**About BioHio:** BioHio Research Park is an Affiliate of The Ohio State University, College of Food, Agricultural, and Environmental Sciences, based on the Wooster, OH campus. BioHio is a nexus for technology, talent, and resources focused in agbioscience. BioHio offers incubator space and entrepreneurial business support as well as a master planned research park community for businesses seeking collaboration with OSU agricultural faculty research.
